Subject: WisCOSH 2012 Resource Directory

In the last year workers around the world have stood up to tyrannical governments and militaries demanding fair treatment and good lives.

When Gov. Walker began his efforts to return WI to the days of indentured servitude and serfdom **WisCOSH** was there crying foul and protesting the loss of worker safety and health rights.

When workers filled the capitol **WisCOSH's Board of Directors** and membership joined together with workers from *all* industries and professions to occupy the capitol grounds and demand justice from elected officials.

When workers are in need of help at work **WisCOSH** is there to provide it. **WisCOSH** provides outreach, training and advocacy to all workers. A big part of how **WisCOSH** reaches workers is through the publishing and distribution of the Resource Directory. It is part of the materials provided in every training **WisCOSH** holds.

The WisCOSH Resource Directory is full of contact information for many types of workplace safety and/or health issues. It has phone numbers, e-mail & website addresses for help from government agencies and private organizations. It includes contact information for elected officials so workers can let them know what they want and need and let them know when they get it right or wrong.

The WisCOSH Resource Directory also has letters and stories from the Board of Directors. Pictures from events. The list of workers killed on the job the previous year. And much more.

Please show your support for **WisCOSH** and workplace safety and health by placing an ad in the 2012 Edition which will be released at **Workers Memorial Day – April 28th, 2012**. Act now and get **25% off** the regular price. Anticipated press run is 1,500 copies. In the past 2nd printings have been needed to meet demand.
